

## ***New Turbine Murphy Moose***

***AME-built Turbine Moose*** – only 35.5 hr. TT !

This well equipped **Turbine Murphy Moose** was built by an AME. The FWF kit came from the experts in Montreal, and included the **P & W PT-6-20 turbine** - 750 hp., de-rated to 550 hp. It has large fuel tanks – 160 gal. of jet fuel, for good range. The brand new Montana 4000 Amphib floats give real versatility ! Gross weight is 3675 pounds – she'll carry a lot !

The workmanship on this aircraft is better than you'll find on any certified plane and the paint job is great. This is a huge airplane with 4 to 6 seats, and room for LOTS of luggage, with a separate cargo door !

### **Equipment:**

Dual Grand Rapids panel, 4 Fully Adjustable Individual Seats, Electric Elevator Trim, Front/Rear seat heat, Heated Pitot, Strobes/Nav Lights, Internally Lighted Instrument Panel, Landing and Taxi Lights, Ailerons reflex down with full flap deployment effectively providing full span flaps.

### **Avionics:**

Amps/Volts/Oil, fuel totalizer, Transponder w/encoder, Audio Panel.

**Asking only \$ 450,000 USD, negotiable.**
