

** Important documents – manuals & checklists – Annual Inspection Checklist

We have had some requests for **Annual Inspection Checklists**. Builders should create their own, for their particular aircraft, as they all differ somewhat in accessories. To help with this, here are some useful guides for **Rebels** – other kit models can follow the same format.

Here is a link to the **Rebel Maintenance Manual** :

<http://www.pattersonaerosales.com/Aircraft/Rebel/REBMAIN.pdf>

All builders should have a copy of this, to be used as a guide to create their own annual inspection checklist for their particular aircraft.

The USA "**Condition Inspection Checklist**" compiled from **FAR 43, Appendix D**, is also a good start on an annual inspection checklist. Here's a link:

<http://www.pattersonaerosales.com/TechTips/ConditionInspectionChecklist-A.pdf>

Owner's can utilize a checklist similar to this or the Canadian equivalent ... I'll publish the link if someone can provide it. Also links to any lists that builders have set up and are using would be appreciated.

The **Rebel** Pilot Operating Handbooks can be found on the **Rebel** web page :
